

# Center for Sight

## Refraction Policy

**Refraction** is the process of determining the optimal eyeglass prescription for your eyes. It is a separate service from your eye exam. Refractions help us prescribe the correct prescription for your glasses as well as provide an indication of how well you can see.

A refraction may or may not be performed at the time of your visit, depending on the doctor's judgment of its necessity. This service is not covered by Medicare or private insurance companies, and if it is performed there will be a \$35 fee in addition to any co-insurance or copay owed for the visit.

If you want a prescription for glasses, this fee must be paid at the end of your visit.

I have read and understand the office policy on refraction. I also understand that this policy will apply to all my future visits.
